

Motor Vehicle: IMI Service and Maintenance Engineering

Year 10

The students will study a Level 2 Certificate covering the following units across two years:

Group A- Mandatory Units:

ET211: Health and Safety Practices in an Engineering Maintenance Environment

ET212: Tools and Equipment Used in an Engineering Maintenance Environment

ET214: Mathematics and Science for Engineering Technicians

ET216: Supporting Job Roles in an Engineering Environment

Group B- Core Unit (Mandatory):

ET213: Undertake a Project in the Engineering Environment

Group C- Self Development Units:

PSD05: Preparing for Work

Group D- Specialist Units:

ET230: Routine Vehicle Maintenance

ET234: Removing and Fitting Basic Light Vehicle Mechanical, Electrical Trim (MET) Components and Non-Permanently Fixed Vehicle Body Panels

Year 11

There is a pathway option in Year 11, where all studying the same content but some not in so much depth. Therefore the work will be individualised, which will be reflected in their final grade. The students will either gain a Level 1 or Level 2 qualification.
